OFFICIAL SYSTEM COMPENSATION DECK

NEVORA

The Next Evolution in Decentralized P2P Wealth

A revolutionary 100% Peer-to-Peer Smart Matrix and Global Autopool Architecture built on Binance Smart Chain (BEP-20). Guaranteed algorithmic execution, zero administrative custody, and automated compounding returns.

- 100% P2P Transfers
- Instant Wallet Settlement
- 12 Progressive Slots
- Perpetual Recycle Engine

Website: **www.nevora.world** • Support: **info@nevora.world** • Chain: **BNB Smart Chain (BEP-20 USDT)**

REINVENTING COMPENSATION SYSTEMS

Why NEVORA Redefines Network Empowerment

Traditional centralized investment and MLM platforms fail members through custodial risks, frozen withdrawals, and opaque rules. NEVORA replaces company holding with 100% peer-to-peer on-chain automation.

❌ Traditional Centralized Systems

High Risk

⚠️ **Company Holds Custody:** Funds sit in central wallets vulnerable to hacks and exit scams.

⚠️ **Manual Withdrawal Requests:** Long approval queues, daily caps, and sudden account bans.

⚠️ **Exorbitant Fees:** 10% to 25% admin deductions eating away your team's hard-earned commissions.

⚠️ **Opaque Control:** Founders can arbitrarily change plan structures and block payout trees.

✓ The NEVORA Autonomous Protocol

100% Trustless

💎 **Zero Custody (100% P2P):** Direct wallet-to-wallet transfers on BNB Smart Chain.

💎 **Instant Real-Time Settlement:** Earnings arrive in seconds directly inside your personal Web3 wallet.

💎 **Deterministic Smart Algorithm:** Rules are permanently encoded in software. No human tampering.

💎 **Unrestricted Global Access:** Anyone with a Web3 wallet can participate anywhere, 24/7/365.

Immutable On-Chain Verification

Every slot activation and recycle payout generates a public transaction hash on BscScan.

BEP-20 USDT Standard

EMPOWERING GLOBAL AFFILIATES

6 Core Benefits Designed For Maximum Profit

Every element of the NEVORA mathematical model is calibrated to maximize individual income, eliminate risk, and compound earnings seamlessly.

Low $15 Entry Barrier

Start building an international digital asset empire with just $15 USDT. Accessible to everyone from beginner enthusiasts to seasoned leaders.

100% P2P Instant Cash

Direct wallet-to-wallet transfers on BNB Smart Chain. No waiting for withdrawal approvals, payout holidays, or administrative release.

Zero Out-Of-Pocket Upgrades

The system automatically reserves payments #3, #4, and #5 to propel you to higher slots. You never have to spend extra personal money to upgrade.

Global Autopool Spillover

Slots 2 through 12 run on a Global First-Come, First-Served matrix. Experience automated spillover from worldwide company momentum.

Continuous Recycle Loops

Completed slots automatically re-enter the Recycle Pool up to 11 times. Enjoy perpetual, compounding income without re-joining.

100% Non-Custodial Safety

Connect with Trust Wallet or MetaMask. Your private keys stay yours. Total security, complete privacy, and zero counterparty risk.

SYSTEM ECONOMICS

The 12 Progressive Matrix Slots

Each slot multiplies your earning potential. Members enter at Slot 1 and automatically advance through all 12 slots via algorithmic progression.

SLOT TIER	NAME	ENTRY FEE	MATRIX TYPE	RESERVED FOR NEXT	SYSTEM FEE	NET PAYOUT / CYCLE	MAX RECYCLES
Slot 1	Starter	$15.00	Working Tree (3-Leg)	$45.00 ($15 × 3)	$0.00	$45.00	11 Cycles

Slot 11	Elite	**$703,824.00**	Global Autopool	$698,703.00 ($232,901 × 3)	$2,559.00	**$698,703.00**	1 Cycle
Slot 12	Infinity	$2,096,109.00	The Pinnacle	$0.00 (Max Reached)	$5,121.00	$2,090,988.00	Unlimited

DIRECT SPONSORSHIP & TEAM SYNERGY

Slot 1: The 3-Leg Working Matrix

Slot 1 is your personal team launchpad. Every new registration is placed into a high-efficiency 3-branch sub-tree under your lineage using algorithmic BFS spillover.

Algorithmic Breadth-First Spillover (BFS)

Auto-Fill

- **Balanced Placement:** New recruits automatically fill empty spots from **Left-to-Right, Level-by-Level**.
- **Team Support:** Even if a personal direct has not yet recruited, spillover from active uplines places new members under them, helping everyone progress.
- **No Dead Legs:** The BFS queue guarantees that no branch is left unfilled, maximizing velocity across all 3 legs.

P2P Leg Payment Distribution:

- **Leg 1 (Left):** Routes to Upline 1 (Parent's Sponsor).
- **Leg 2 (Center):** Routes to Upline 2 (Grandparent's Sponsor).
- **Leg 3 (Right):** Routes directly to the Direct Parent!

13 Total Payments received across your sub-tree generates maximum payouts and triggers automated graduation to Slot 2!

SYSTEM-WIDE WEALTH DISTRIBUTION

The Global First-Come, First-Served Autopool

Once you graduate to Slot 2 (Bronze) and above, you enter the international company-wide Autopool, where placements occur globally regardless of who sponsored whom.

FCFS Priority Queue

Every member upgrading anywhere on the planet enters the global queue in strict chronological order. Earlier qualifiers sit higher in the global matrix.

Cross-Team Momentum

You are no longer dependent on only your personal downline. Massive international leader activity spills down into the global pool, filling your positions automatically.

Top-to-Bottom Auto Fill

The system evaluates the global tree from top-to-bottom and left-to-right, placing new entrants into the earliest vacant slot positions with absolute fairness.

🚀 Autopool Acceleration Example (Slot 2 Bronze - $45 Entry)

When global members advance to Slot 2, they are routed to your Bronze matrix. 13 payments × $45 generates instant cash flow and auto-triggers Slot 3 ($135) activation!

100% Automated by Contract

PRECISION FINANCIAL ENGINEERING

How Every 13-Payment Cycle Distributes Wealth

Each slot position is eligible to receive precisely 13 payments. The protocol automatically divides these payments into three vital functions: direct cash, level upgrade, and re-entry.

#1	#2	#3	#4	#5	#6	#7	#8	#9	#10	#11	#12	#13
WALLET PAYOUT	WALLET PAYOUT	AUTO UPGRADE	AUTO UPGRADE	UNLOCKS NEXT	WALLET PAYOUT	WALLET PAYOUT	WALLET PAYOUT	WALLET PAYOUT	WALLET PAYOUT	WALLET PAYOUT	WALLET PAYOUT	RECYCLE POOL

9 Direct Wallet Payouts

Instant

Payments **#1, #2, and #6 through #12** are routed directly and immediately to your personal BEP-20 Web3 wallet. Instant spending liquidity in USDT.

3 Auto-Upgrade Reserves

Zero Pocket Cost

Payments **#3, #4, and #5** are accumulated to fund your next higher tier. Upon receiving Payment #5, the contract activates your new slot automatically!

1 Recycle Pool Re-Entry

Perpetual

Payment **#13** automatically triggers your re-entry into the Recycle Pool for this slot, reopening a fresh 13-payment cycle to earn repeatedly.

INFINITE RESIDUAL WEALTH

The Perpetual Recycle Multiplier

In standard MLM systems, once a board or matrix completes, you must buy another package out of pocket. In NEVORA, your slot recycles automatically up to 11 times.

How the Recycle Pool Operates

Self-Sustaining

• **Automatic Position Re-Creation:** When Payment #13 settles in your active slot, the system creates a new position for you in the Recycle Pool of that slot.

• **Zero Extra Deposit Needed:** The re-entry fee is deducted automatically from Payment #13, so you never have to invest new capital.

• **11 Pure-Profit Payouts:** In the Recycle Pool, you do not need to upgrade to higher slots anymore! Payments #1 to #4 and #6 to #11 go 100% straight to your personal wallet (Payments #5 & #12 support system operations).

Recycle Capacity Per Slot

Max Cycles

Slot 1 (Starter): **11 Recycles**	Slot 2 (Bronze): **10 Recycles**
Slot 3 (Silver): **9 Recycles**	Slot 4 (Gold): **8 Recycles**
Slot 5 (Platinum): **7 Recycles**	Slot 6 (Diamond): **6 Recycles**
Slot 7 (Crown): **5 Recycles**	Slot 8 (Royal): **4 Recycles**
Slot 9 (Ambassador): **3 Recycles**	Slot 10 (Legend): **2 Recycles**

💡 Total of 66 Lifetime Recycle Generations compounding concurrently across all 12 slots!

MATHEMATICAL PROFIT PROJECTIONS

The Path From $15 to Financial Freedom

Because all upgrades occur through automated payment reservations, a participant starting with just $15 can systematically tap into hundreds of thousands in net USDT earnings.

INITIAL PERSONAL CAPITAL

$15.00

One-time activation for Slot 1 Starter. Zero further deposits required.

PRIMARY SINGLE-CYCLE YIELD

$3,142,506

Cumulative net payouts generated as you traverse through Slots 1 to 12 once.

FULL RECYCLE POTENTIAL

$10,000,000+

Total mathematical revenue when all 66 recycle loops across 12 slots complete!

No Point Reductions • No Maintenance Thresholds • No Breakaway Penalties

Unlike product MLMs with shrinking PV/BV percentages, 100% of USDT volume is routed directly between members.

100% Volume Efficiency

FAST-TRACK SETUP

How To Get Started With NEVORA Today

You are just 5 minutes away from activating your global P2P income stream. Follow these three simple steps to start earning on the Binance Smart Chain.

01

Setup & Fund Web3 Wallet

• Download **Trust Wallet**, **MetaMask**, or **SafePal** on mobile or desktop browser.
• Fund your wallet with at least **15 USDT (BEP-20)** plus **$1-$2 of BNB** to cover minimal blockchain gas fees.

02

Connect & Register

• Open your Web3 dApp Browser and navigate to your sponsor's link: **www.nevora.world/register**.
• Connect your BEP-20 wallet address with one click. No lengthy paperwork or KYC required.

03

Activate Slot 1 ($15)

• Click **"Activate Slot 1"** on your member console. Confirm the $15 USDT transfer on-chain.
• Your position in the Working Tree is live immediately! Share your invite link and let the automatic upgrade engine do the rest.

Supported Web3 Wallets: Trust Wallet • MetaMask • SafePal • Binance Web3 Wallet • TokenPocket

100% Mobile Ready

GUARANTEED INTEGRITY

Built For Longevity, Speed & Transparency

NEVORA eliminates every single vulnerability associated with legacy systems through non-custodial cryptographic automation.

100% Non-Custodial Architecture

- The system never holds or freezes customer deposits in a central reserve wallet.
- Payments move instantaneously from payer to payee wallet in verified blockchain blocks.
- Impossible to exit-scam or delay withdrawals because payments do not pool in company hands.

Binance Smart Chain (BEP-20)

- High speed: 3-second block finality ensures lightning-fast tier upgrades.
- Ultra-low fees: Microscopic gas fees (averaging $0.05 to $0.15) compared to expensive Ethereum gas.
- Stable Value: All transactions executed in USDT (BEP-20) so income is immune to crypto market volatility.

Open Auditability

- Every slot position and payment route has a verifiable TX Hash.
- Full downline turnover, active leg volumes, and cycle completions can be inspected in real time in your member console.

Universal Equal Opportunity

- Algorithmic parity: Whether you are member #1 or member #100,000, the 13-payment math and BFS autopool logic apply identically to all participants.
